

MKT MACHINING

Magpul AICS Mag Extension Instructions

Thanks for purchasing our product! Reviews and customer satisfaction are extremely important to us, and we truly appreciate when someone takes the time to leave an Amazon or website rating. Amazon in particular stresses a high priority on customer feedback.

To install this extension, first remove the baseplate from your magazine by pressing in the "button" and sliding it forward. Remove follower and spring. Remove lock from back of extension. Slide extension on, angled section facing "up". Install C shaped clip into holes on back of extension to prevent it from sliding forward under impact. Insert follower and spring in the same manner they were removed. Install baseplate on bottom of extension as it was on the stock magazine, and make sure the "button" sits back in the hole of the baseplate. Manually depress follower, load some rounds, and make sure everything is functioning as it should and there is no binding.

Go shoot!
