

MKM MACHINING

Milled Throw Lever Instructions

Thanks for purchasing our product! Reviews and customer satisfaction are extremely important to us, and we truly appreciate when someone takes the time to leave an Amazon or website review. Amazon in particular stresses a high priority on customer feedback.

This item is milled from 6061 Aluminum with a hardcoat anodization. There is just one bolt to attach this throw lever around your magnification ring. Recommended torque is 10 in/lbs, or when throw lever is secure without slipping. It is entirely possible to damage your scope by excessive torque on the lever. Assess mag ring feel during tightening, if you notice your magnification ring is binding STOP and loosen throw lever.

Have an optic we don't offer a throw lever for? We're always open to suggestions, and try our best to respond to consumer input. We wish you happy and safe shooting! MKM
